

JAISMIN KAUR

Toronto, ON | jaisminks06@gmail.com | jaismin.design | linkedin.com/in/jaismin-ks | github.com/jaismin-ks

EDUCATION

Seneca Polytechnic

Bachelor of Technology, Honours in Software Development / GPA: 3.9

– Renewable Degree Award (scholarship)

Toronto, ON

Jan 2025 – May 2028 (expected)

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, C++, C#, SQL, HTML, CSS

Frontend: React, Next.js, Three.js, React Three Fiber, GSAP, Tailwind CSS, Vite, Leaflet

Backend & APIs: Node.js, Express.js, Flask, REST APIs, JWT Auth, TCP Sockets, Socket.io, Microservices

Data & Cloud: PostgreSQL, MongoDB, SQLite, Firebase, AWS, Docker, Vercel, Railway, GitHub Actions (CI/CD)

Testing & Tools: Jest, Cypress, Unit Testing, Git, GitHub, Linux/Unix, Jira, VS Code

AI & Data: Gemini API, LLM Integration, H3 Geospatial Indexing, Open Data

EXPERIENCE

VP Technical Lead

Jan 2026 – Sep 2026

Google Developer Group on Campus @ Seneca Polytechnic

Toronto, ON

- Led technical programming for a **400+ member** developer community, organizing and delivering workshops in web development, cloud computing and software engineering fundamentals
- Planned and hosted hands-on technical sessions and project-based events that improved member engagement and practical coding proficiency
- Designed a semester-long event strategy with the executive team, and mentored members to strengthen peer-to-peer learning

Software Programming Instructor

Mar 2025 – Sep 2026

Code Ninjas

Toronto, ON

- Led instruction for **100+ students** building software projects with JavaScript, Python, Unity (C#) and robotics/AI tools
- Delivered live coding sessions on programming fundamentals, game logic and debugging, translating complex concepts into practical applications
- Diagnosed and resolved code issues while guiding students to optimize logic, improve performance and strengthen problem-solving

PROJECTS

Smart Home System | C++, TCP Sockets, Multithreading, Node.js, React

github.com/jaismin-ks/smart-home-system

- Built a **multi-threaded C++ TCP server** on raw POSIX/Winsock sockets with a thread per client, mutex-guarded shared state and a per-device worker thread
- Designed an HTTP-style text protocol with status codes, plus a Node.js/Express bridge translating a React dashboard's HTTP/JSON calls into it, so web and CLI clients drive the same server

Voltex Risk Intelligence | Next.js, TypeScript, Leaflet, H3, Gemini API

Seneca Hackathon 2026 (team of 4)

- Built storm-outage risk scoring for Ontario's power grid across **673 H3 hexagonal zones**, combining live Environment Canada weather with canopy, flood, outage-history and severe-weather data
- Made every score explainable with a five-factor weighted breakdown, an interactive Leaflet choropleth and a Gemini-generated operator brief with a deterministic fallback

Loop Game Platform | React, Flask, PostgreSQL, Vercel, GitHub Actions

loop-nine-sigma.vercel.app

- Built a Flask REST API in feature blueprints over a **10-table** SQL schema, with a React 19 frontend for game libraries, wishlists, price-drop alerts and a key store
- Wrote a genre-based recommendation engine with parallel RAWG API calls via a thread pool, and deployed Flask as a Vercel serverless function on Neon Postgres with CI tests on every push

TheraPlay | JavaScript, Socket.io, Fabric.js, Firebase, ElevenLabs

Hackville Hackathon (team of 3)

- Built a peer-support web app that anonymously matches users facing similar challenges, with real-time chat over Socket.io and a collaborative Fabric.js drawing canvas
- Integrated Firebase Authentication, ElevenLabs speech-to-text/text-to-speech for voice chat and Perplexity AI for post-session insights

Interactive Portfolio | React, Three.js, React Three Fiber, GSAP, WebGPU

jaismin.design

- Built a scroll-driven 3D portfolio with a walkable Three.js forest, a custom GLSL post-processing transition, a real-time WebGPU water simulation and GSAP ScrollTrigger animation
- Added a recruiter mode and touch-device fallback, lazy-loaded 3D scenes and responsive layouts computed from the viewport for smooth performance at any window size
