Education

Bachelor of Technology, Honours in Software Development — Seneca Polytechnic

Jan 2025 – May 2028

Toronto, Ontario | GPA: 3.9/4.0

- Recipient, Bachelor of Technology Software Development Renewable Degree Scholarship — for excellent academic performance
-

Work Experience

VP Technical Lead — Google Developer Group @ Seneca Polytechnic

Jan 2026 – Present

- Led and coordinated technical programs and workshops for a 400+ member developer community, delivering structured sessions that improved participation and member satisfaction
- Planned and hosted interactive group sessions and events focused on clear communication and hands-on activities, driving higher attendance and retention
- Collaborated with the executive team to design and execute a semester-long programming strategy, mentoring members and supporting overall community growth

Programming Instructor — Code Ninjas

Mar 2025 – Present

- Led instruction for 20+ students building software projects using JavaScript, Python, Unity (C#), and robotics/AI tools, reinforcing hands-on development skills
- Delivered live coding sessions on programming fundamentals, game logic, and debugging, translating complex concepts into clear, practical applications
- Diagnosed and resolved code issues while guiding students to optimize logic, improve performance, and strengthen problem-solving approaches

Guest Services Representative — QuadReal Property Group

July 2026 – Sep 2026

- Delivered multi-channel customer support (phone, email, in-person) for a high-traffic retail environment, prioritizing and resolving competing requests under time constraints while maintaining service quality
 - Used Microsoft Excel and Word to complete administrative reporting and payment reconciliation across cash, credit, and Interac transactions, ensuring data accuracy
 - Followed and enforced multi-step operational procedures (access control, lost and found, equipment sign-out), demonstrating strong attention to detail and process compliance
-

Technical Projects

Voltex — Storm Outage Risk Intelligence — Next.js, TypeScript, Leaflet, H3, Gemini 2.5 Flash

May 2026

- Built a map-first outage-risk dashboard dividing Ontario into 673 H3 hexagonal zones, scoring each against a transparent 5-factor weighted model (live wind, vegetation density, flood exposure, outage history, severe weather patterns)
- Integrated live Environment Canada weather data, NRCAN flood products, and Toronto Open Data (311, street trees) through a build-time pipeline that generates derived JSON indices for fast runtime lookups
- Designed a Leaflet choropleth risk map with drill-down factor breakdowns and Gemini-generated operator briefings, deployed on Railway with graceful fallback when LLM calls fail

Loop — Game Discovery & Marketplace Platform — React, Vite, Flask, SQLite, Docker

Jan 2026 – Apr 2026

- Developed a full-stack platform letting players discover, organize, and purchase games in one place, combining library management, price tracking, and personalized recommendations
 - Delivered RAWG API integration, a price simulation and tracking engine, and a notification system for price drops and DLC updates, supported by 42 unit tests and GitHub Actions CI
 - Implemented status-based library shelves, custom playlists, a wishlist with automated price alerts, and a full cart-to-checkout purchase flow, containerized with Docker for consistent deployment
-

Skills

Languages: C, C++, JavaScript, Python, SQL

Web & Frontend: CSS, Full-Stack Development, HTML, MERN Stack, Next.js, React, Tailwind CSS, Three.js

Backend & APIs: API Integration, Authentication & Authorization (JWT), Express.js, Microservices Architecture, Node.js, REST APIs, Server-side Development

Cloud, DevOps & Tools: AWS, Cloud Fundamentals, Docker, Git, GitHub, Jira, Linux/Unix, Web Application Deployment

Project & Teamwork Tools: Git/GitHub, Jira, Microsoft Teams, SharePoint, Slack, Trello

Development & Deployment: AWS, Cypress, Docker, Jest, Linux/Unix, VS Code
